

Interventions at St James' Infant and Nursery School

Kidsafe

How it works

Kidsafe is a programme used across the school to support our pupils with safeguarding issues and aims to educate them without shattering their innocence.

Topics that are taught include:

- Bullying and cyberbullying
- Internet safety and appropriateness of gaming software
- Abuse (all categories) and domestic abuse prevention

With the help of our money puppet KS, the sessions are designed to help children take an active role in deciding how they can recognise and protect themselves from all forms of abuse.

Kidsafe UK provides training for key staff in school and resources are provided for staff to deliver a fun, age appropriate, preventative safeguarding programme which the children will enjoy.

All of our staff are trained in Kidsafe and St James' is a Kidsafe accredited school. Mrs Joanne Cocksedge is the lead in this area.
