

Interventions at St James' Infant and Nursery School

The Number Box Maths Intervention

How it works

To understand number concepts, it is vital that pupils have no gaps in their understanding. The aim of 'The Box' is improve basic skills and ensure that the pupils have an understanding of all the necessary mathematical stages/skills.

The Number Box contains enough resources to work with 1-2 pupils or support and demonstration to a small group.

The programme is delivered by STAs for 10 minutes sessions and pupils are identified through teacher observations, assessments and pupil progress meetings. There is a specific order to follow and STAs have specific instructions through the teaching handbook. However, the box may be 'dipped' into for specific cases.
